

SALVADOR IN NEED OF MONEY FOR CROPS

(By Associated Press)
SAN FRANCISCO, Cal., May 2.—The first and greatest need of the republic of Salvador is money, said Salvador Sol, new minister of plenipotentiary at Washington for that country who has just arrived from South America. The money is needed at once, according to Minister Sol.

"Twenty-five millions of dollars are needed to properly take care of our coffee crop and the government of the republic will not only welcome foreign capital but will make every fair inducement to attract it," he said. "We are particularly anxious to increase our commercial relations with the United States."

"The reason that Salvador did not actively enter into the war against Germany was the fact that there was an old clique of politicians favorable to that country. Since the war that element has been completely eliminated. The administration of the country as elected now is entirely in the hands of pro-American officials. Our president, Jorge Melendez, was educated in the United States and I am one of a number of others in official positions who have had the same advantages."

"We are particularly anxious for some large banks who can do business in a big way to open up Salvador. There are two banks of a capital of a half million dollars who have started business but what we really need is an institution which will have a capital of at least ten millions of dollars."

"Any man who has capital, say about \$10,000, will find excellent opportunities for investment which, with work and care, will bring him returns well worth while. I should strongly advise against any young man who has only his hands and his brain to depend on from going down there."

"Our coffee before the war was consumed in France, Italy, Germany and England. Now Germany is eliminated and the United States is getting one-half of our crop. It will be my particular endeavor to foster the commercial relations between the two countries and to interest capital."

"We reply for our protection on the United States confident of its fairness; so much so that we sent our

RICH ORE BEING SHIPPED FROM TONOPAH DIVIDE

Driving of a crosscut to the vein on the fifth level of the Tonopah Divide has not yet been started, the delay being caused by the erection of new electric machinery. The fourth level crosscut is being continued in good ore, with rich material being found in quantity at numerous places. No official announcement as to the length of workings or value of ore have been made by the management recently, but new figures are expected to be furnished for publication within a short time, and it is rumored that they will show high average figures for the fourth level drift, which will remain the center of interest until crosscutting for the vein is started on the fifth level. Shipments of high average grade continue at a rate of 60 tons weekly.

PERSHING SENT HONOR ROLL ON CHRISTY POSTER

More Nationalities Among
America's Dead Than at
Peace Conference.

"Americans All," the Howard Chandler Christy Victory Liberty Loan poster caused folks to pause and study the names on the roll of honor.

Oh, yes, several noticed the Christy girl, too, but the names were taken from actual casualty lists sent from the battlefields by General Pershing. Du Bois, plainly a French name; Smith, who in this case was an Englishman; O'Brien, "auff ced"; Cefka, a Bohemian; Hancock, a somewhat different German; Pappandriopoulos, a Greek; of course; Andras, of Hungary; Villotte, of sunny Italy; Levy, of one of thousands of Jews who were with the A. E. F.; Turovich, a Jaro-Slav; Kowalski, a Pole; Chiricanevich, of Russian origin; Knutson, a Scandinavian; and Gonzalez, of the blood of the Donas.

Americans all, are these, even if all first did see the light of day from skies that brightened the lands of their nativities.

Subscribe for them.

GO TO CHURCH VICTORY SUNDAY

Go to church next Sunday if you read this before May 4. It will be Victory Sunday throughout the land.

Everywhere ministers, priests, rabbis, pastors will carry the message of the Victory Loan to their congregations. Protestant, Catholic, Jew—all will hear the same message—the story of why America must raise this last Liberty Loan.

Go to church. It will do you good anyhow.

Mayor Hanson, the justly celebrated Mayor of Seattle, began life as bootblack. No wonder he shines.

Of the fifteen lines comprising the system of Chinese government railways only one was built by the Chinese themselves.

Five Score Aviators Killed in Texas Camps

(By Associated Press)
FORT WORTH, Texas, May 2.—A hundred and six men were killed at the three big government aviation fields here between November 15, 1917, and the recent close of aerial activities, according to official figures just made public.

In the same period, the three fields now being closed turned out 1475 finished aviators, most of whom were sent to the western front. A thousand commissioned aviators were also sent here from other schools to finish their gunnery course at Hallsboro field.

The statistics made public show that during the training period the actual flying hours at Carruthers field totaled 35,000, at Barran field, 26,608, and at Tallaferro field, 32,488.

The tall spin and nose dive were responsible for a large majority of the accidents, according to officers. In the entire training period not a single American cadet was killed on the first solo flight. This is attributed to the thorough instruction in ground work. Three British fliers were killed on solo flights.

While the tall spin and nose dive were chief factors in the fatality list,

there were many other contributing causes.

Captain Vernon Castle, the American dance interpreter, who had faced death numerous times over the German lines as a British aviator, swerved his machine sharply to avoid hitting another aviator here. He lacked height for the maneuver, crashed and was killed.

The young son of General Peyton C. March, chief of staff, was killed at the gunnery field while engaged in combat practice at a height of 2000 feet. The wings of his machine became entangled with those of his opponent's plane.

Captain Robert Isett, of Providence, post adjutant at Barran field, fell from the greatest height, 5000 feet. Two men fell from their planes at great heights because of failure to strap themselves in.

A six-cylinder 162 horse power Benz engine used for Zeppelin purposes has cylinders 130 millimeters diameter and 180 millimeters stroke. The cylinders are all cast separately, and the weight of the engine complete comes out at 370 pounds per brake-horse power at the normal speed of 1550 revolutions a minute.

LEAGUE RECORD FOR THE COAST

(By Associated Press)
SAN FRANCISCO, Cal., May 2.—A comparison of the standings of the leading clubs of the Pacific coast league at the end of the first few weeks of play show that the first division teams are far in advance of their percentages of last season. Los Angeles which went off to a flying start registered a percentage of 867 as against 385 last year. Salt Lake shows 727 this year as against 385 at the same time last season. With only a comparatively few games played thus far, percentages take decided rises and falls and the losing or winning of a game or two at this time of the year will completely change the complexion of a team's average.

It is several years since any team has registered as low a percentage as Portland's 154 at the end of the second week which means that this team up to that time had won only two of the thirteen games played. No team has fallen below 286 in the last three seasons, both Oakland and San Francisco having dipped down to this figure after the playing of at least two series of games.

The showing made thus far by the two teams out of the Northwest has

not been impressive but critics seem to agree that, as they shape up, both Portland and Seattle will have to be reckoned with by the other clubs in the circuit.

It is seldom that a club has started the season in the coast league with the advantage gained during the first two weeks by the Los Angeles team and, from now on, critics expect to see the gradual settling of the high percentage to something like the usual normal figures.

Niagara Falls has been ice bound three times. The famous cataract was ice bound and the American falls were bared of water for several days in February, 1919. This phenomenon has occurred only twice before, in March, 1845, and again in March, 1903.

Telephones in elevators are the latest invention. This ought to enable a weak-lunged man to lift his voice.

"Honest to Goodness" DOUGHNUTS

The kind you can't get enough of—doughnuts everybody relishes—doughnuts that are light, fluffy and tender as any cake. This is what you get when you use

CALUMET BAKING POWDER

"BEST BY TEST"

The ideal baking powder wherever baking powder is needed—insures greatest baking savings and guarantees better baking results. In doughnuts—in any baking—you are assured tasty, tender, evenly raised goodies that are thoroughly wholesome. Used by more housewives than any other. Double the usual leavening strength.

Made in the world's largest, finest, most sanitary baking powder factory.

CALUMET DOUGHNUTS

1/2 Cup sugar 1 Egg 2 1/2 Level teaspoons Cal-
3 Level teaspoons shortening umet Baking Powder
1 Level teaspoon salt 2 1/2 Level cups flour
1/2 Cup milk or water Lemon and mace flavor

How to make them—Cream sugar and shortening together, add well beaten egg. Then add milk. Next mix in flour and baking powder well sifted together. Work dough as little as possible. Turn out on well floured board and roll out quarter inch thick; cut with doughnut cutter and fry in boiling hot fat.

This is one of the many famous Calumet recipes, furnishing America's tables with more delicious bakings. Cut out and paste in your recipe book for future reference.

Observe This

When you buy a pound of Calumet you get a full pound—16 oz. Some high priced baking powders are now being put on the market in 12-oz. cans instead of a pound. Be sure you are getting a pound when you want it. No short weights with Calumet.
